Some stuff about me

- My research interests lie in **advancing methodologies in spatial causal inference** and **developing high-performance computational tools**, with a primary focus on *R packages*.
- Currently, my work centers on **Empirical Dynamic Modeling (EDM)** framework for modeling *dynamic system* and **Difference-in-Differences (DID)** methods for *event studies*. I am particularly interested in leveraging these approaches to address critical challenges in *urban sustainability*, *climate change mitigation*, and broader global issues.
- I possess expertise in *data analysis*, *statistical modeling*, and the development of *R packages* and open-source analytical tools utilizing **R**, **C++**, and **Python**.
- I have contributed to the **development** and **maintenance** of several open-source spatial analysis tools within the R community and remain dedicated to **advancing open-source geospatial analysis software**.

Education

2021-2025	BSc In Geographic Information Science Xi'an, Shaanxi	Shaanxi Normal University

Honor

2024.12	Longi Non-Education Major Scholarship
2024.11	First Prize in the 13th National University Student GIS Application Skills Competition
2024.06	National University Student Innovation and Entrepreneurship Training Program Qualified Completion
2023.12	Grand Prize in the 12th National University Student GIS Application Skills Competition
2023.11	First Prize in the Second National University Student Ecological Environment Management Research Innovation Competition
2023.12	Second Prize of the 5th 'Guodi Cup' National College Student Natural Resource Science and Technology Competition, China Society of Natural Resources
2021.10	Outstanding Individual in Military Training Publicity for College Students, Shaanxi Normal University

Unpublished

First Author	Measuring causal associations by geographical cross mapping cardinality	Submitted to IJGIS
--------------	--------------------------------------------------------------------------------	--------------------

Third Author	Agricultural policies reshape cropland patterns with varying impacts - a case of soybeans from Heilongjiang Province review	Submitted to Land Use Policy, currently under review	
First Author	Decomposing spatial causality through mutual information		Plan
First Author	On the role of explicit spatial information in stratified heterogeneity		Plan
First Author	Geocomplexity Mitigates Spatial Bias		Plan

Developed Spatial Analysis Toolkit

Package	Description	Source Code	Language
spEDM	Spatial Empirical Dynamic Modeling	https://github.com/stscl/spEDM	C++, R
gdverse	Analysis of Spatial Stratified Heterogeneity	https://github.com/stscl/gdverse	R, C++, Python
