Some stuff about me

- My research interests lie in **advancing methodologies in spatial causal inference** and **developing high-performance computational tools**, with a primary focus on *R packages*.
- I specialize in *data analysis*, *statistical modeling*, and developing open-source analytical tools, including *R packages*, using **R**, **C++**, and **Python**, with a strong focus on *spatial analysis*. I actively contribute to the R geospatial community and am dedicated to advancing open-source geospatial software.
- Currently, my work centers on **Empirical Dynamic Modeling (EDM)** framework for modeling *dynamic system*, **information theory** for quantifying *information flow* and *variable interactions*, **ordinary differential equations (ODEs)** for characterizing *spatiotemporal processes* and *system evolution*, as well as **counterfactual** and **potential outcomes** framework for estimating *causal effects*. I am particularly interested in leveraging these approaches to address critical challenges in *urban sustainability*, *climate change mitigation*, and broader global issues.

Education

Shaanxi Normal University

B.SC. IN GEOGRAPHIC INFORMATION SCIENCE

Xi'an, Shaanxi

2021.8-2025.6

Research Experience

The Hong Kong Polytechnic University

RESEARCH ASSISTANT

Hong Kong

2026.6-2026.12

The Hong Kong University of Science and Technology (Guangzhou)

RESEARCH INTERN

Guangzhou, Guangdong

2024.8-2026.6
